Overview Background

Founded in 2009, Airband is an independent internet service provider (ISP) bringing high speed broadband to homes, business and industry in rural and hard-to-reach areas.

We are proud to work with the Department for Digital, Culture, Media & Sport, BDUK, local authorities and communities to build high availability infrastructure that residents, businesses and other ISPs can access to help overcome the UK's digital divide.

Trusted by governments, industry partners and communities to bring the fastest, most reliable broadband service to rural communities, industrial parks and outdoor sites.

Project Overview

- You may have heard that Airband, in partnership with **Connecting Devon & Somerset**, has been commissioned to build a brand new, ultrafast FTTP (Fibre To The Premises) broadband network to transform connectivity in your area.
- Over the coming weeks and months we will be working in rural areas across the county, including weekend work, but rest assured that **disruption will be kept to an absolute minimum.**
- Work may involve accessing existing underground ducts and telegraph poles. • You may also see some new telegraph poles being erected at various locations. For the most part, these new poles will be situated along roads away from residential areas.
- We are working closely with the local authorities to **plan and implement the network build.**

REGISTER INTEREST

2

KEEP IN TOUCH

While the network is being built, **we'll keep you updated regularly** via email to let you know how the project is going and when we expect to start taking orders and installing customers.

3

GET ONLINE

You'll get a **FREE** survey to triple check there are no issues with you getting a connection, then an Airband engineer will connect a fibre optic cable from the nearest pole or underground duct to your property, then connect to your router[^]. **Hey presto – ultrafast fibre broadband!**

Benefits of FTTP

Underground FTTP access as well as overhead

What does FTTP stand for?

FTTP stands for Fibre To The Premises. At Airband we provide this service across our network, bringing ultrafast speeds of up to 1Gbps to our customers in more rural areas. There's no line rental or phone line required, so the price you see is the price you get.

What is Fibre To The Premises (FTTP)?

Fibre To The Premises (FTTP) replaces old copper broadband lines; fibre optic cables are run from your local exchange direct to your premises.

Fibre broadband that's faster and more reliable

Because the fibre cable comes right into the building, there is less 'contention' which gives you a faster and more reliable broadband experience.
